

COSC 499: Capstone Software Engineering Project

Dr. Bowen Hui
Computer Science
University of British Columbia Okanagan

GitHub Projects

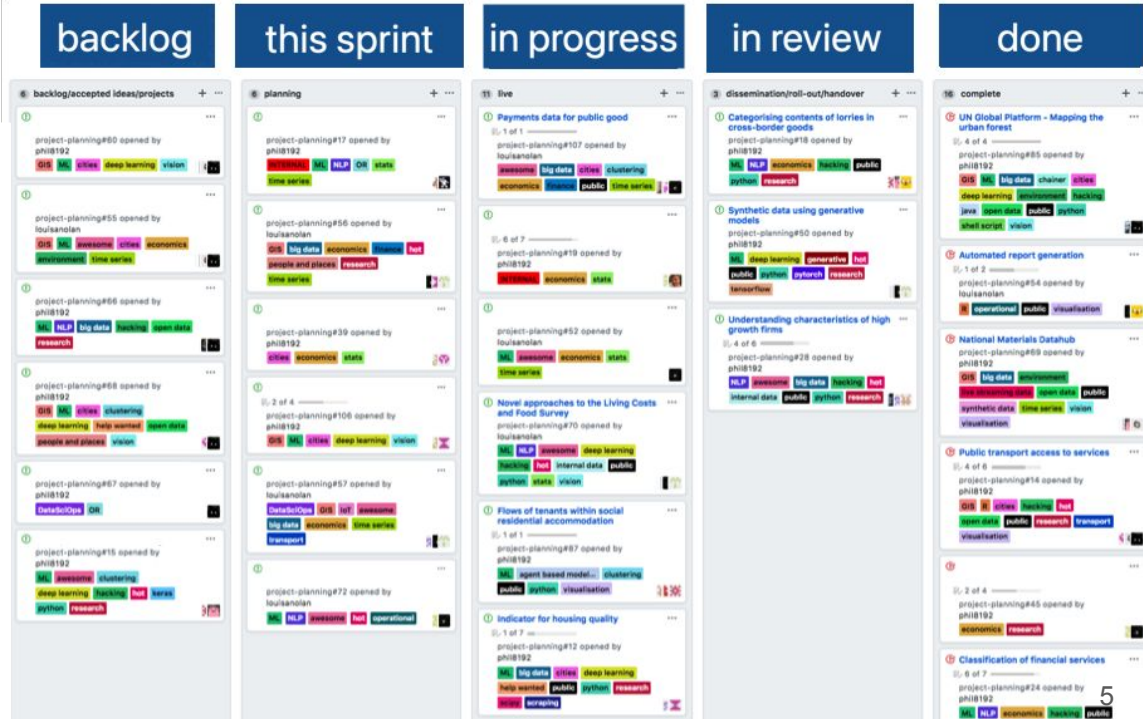

- A way to organize PRs, **issues**, and tasks on a **Kanban board**
- How are these related?
 - Breakdown features into tasks per person → task board
 - Team collaborates on code repository → PRs
 - Notice something wrong? Flag the problem to get it fixed → issues
 - Each issue is automatically connected to a task card

GitHub Projects

- A way to organize PRs, [issues](#), and tasks on a [Kanban board](#)
- How are these related?
 - Breakdown features into tasks per person → task board
 - Team collaborates on code repository → PRs
 - Notice something wrong? Flag the problem to get it fixed → issues
 - Each issue is automatically connected to a task card
- For more details on projects:
<https://docs.github.com/en/issues/planning-and-tracking-with-projects>
- See resource for creating project boards
 - <https://docs.github.com/en/issues/organizing-your-work-with-project-boards/managing-project-boards/about-project-boards>
 - Try using the "Automated kanban with review" template

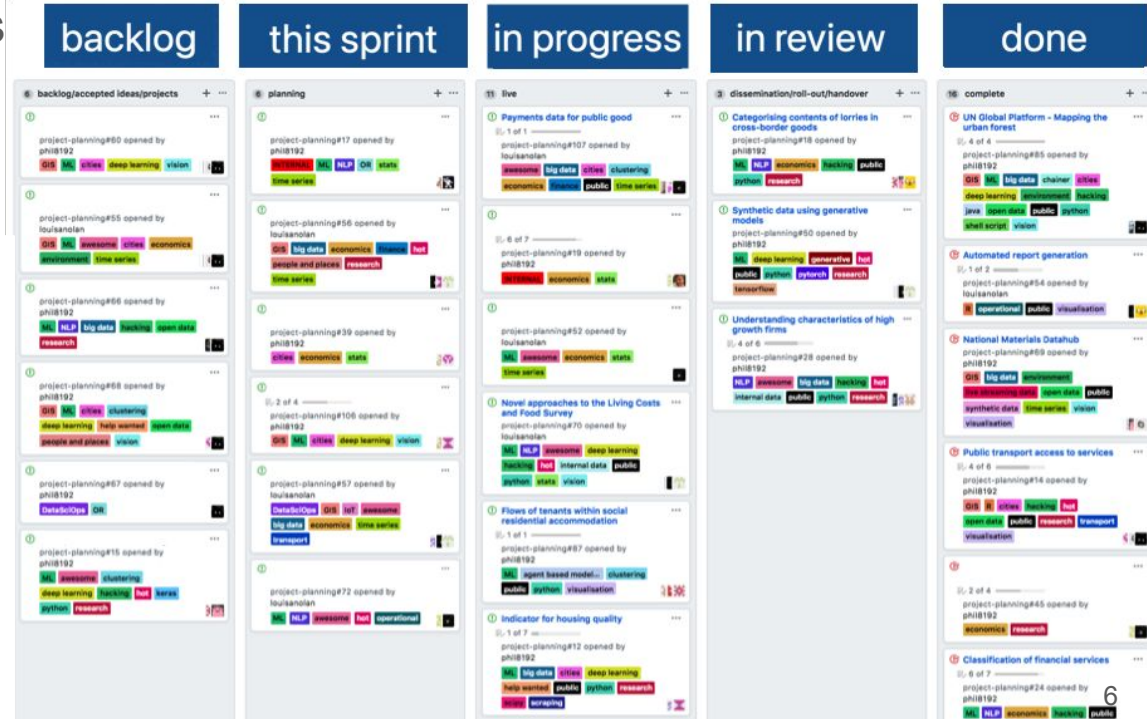

Example Project Board

- Everyone reviews project status and workflow with this board
- Each **stack** (column) shows a card's status

Example Project Board

- Everyone reviews project status and workflow with this board
- Each **stack** (column) shows a card's status
- Each **card** is a task (associated with an issue)

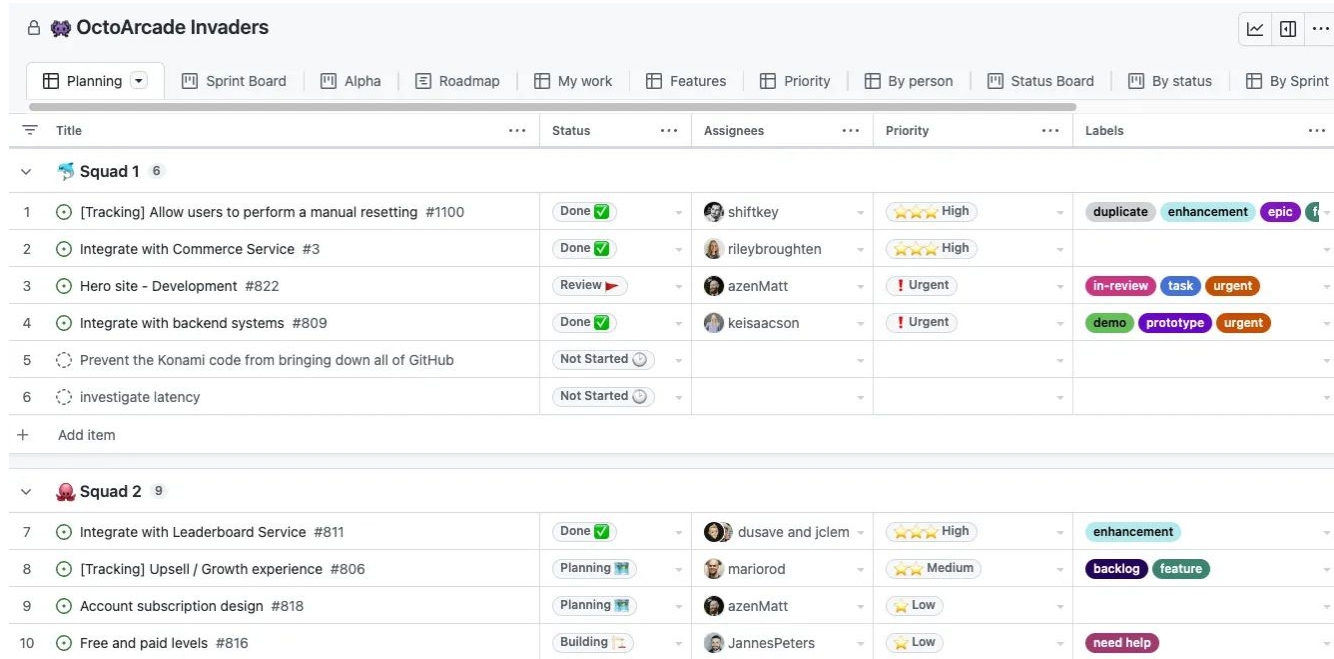

Example Project Board

- Everyone reviews project status and workflow with this board
- Each **stack** (column) shows a card's status
- Each **card** is a task (associated with an issue)
- Each card can be assigned to one or more person(s)
- (Optional) The colorful tags provide additional info to categorize the cards
- Manage your own cards

Alternative View for Weekly Checkpoints

The screenshot shows a GitHub project view for 'OctoArcade Invaders' in the 'Planning' view. The interface includes a navigation bar with various views like 'Sprint Board', 'Alpha', 'Roadmap', 'My work', 'Features', 'Priority', 'By person', 'Status Board', 'By status', and 'By Sprint'. Below this is a table with columns for Title, Status, Assignees, Priority, and Labels. The table is divided into two sections: 'Squad 1' and 'Squad 2'. Each row represents a task with its title, status (e.g., Done, Review, Not Started), assignee, priority (e.g., High, Urgent, Low), and various labels (e.g., duplicate, enhancement, epic, in-review, task, urgent, demo, prototype, need help).

Title	Status	Assignees	Priority	Labels
Squad 1				
1 [Tracking] Allow users to perform a manual resetting #1100	Done ✓	shiftkey	High	duplicate enhancement epic
2 Integrate with Commerce Service #3	Done ✓	rileybroughten	High	
3 Hero site - Development #822	Review ▶	azenMatt	Urgent	in-review task urgent
4 Integrate with backend systems #809	Done ✓	keisaacson	Urgent	demo prototype urgent
5 Prevent the Konami code from bringing down all of GitHub	Not Started ⌚			
6 investigate latency	Not Started ⌚			
Squad 2				
7 Integrate with Leaderboard Service #811	Done ✓	dusave and jclm	High	enhancement
8 [Tracking] Upsell / Growth experience #806	Planning 📅	marirod	Medium	backlog feature
9 Account subscription design #818	Planning 📅	azenMatt	Low	
10 Free and paid levels #816	Building 🏗️	JannesPeters	Low	need help

- See "Table" layout in <https://docs.github.com/en/issues/planning-and-tracking-with-projects/customizing-views-in-your-project/changing-the-layout-of-a-view>

GitHub Issues

- Unrelated to a feature or task, you might notice a change is needed

- Track with issues

- Connect issues to tasks on your project board

- See

<https://docs.github.com/en/issues/organizing-your-work-with-project-boards/tracking-work-with-project-boards/adding-issues-and-pull-requests-to-a-project-board>

Tracking Team Progress

- Recall we want to track project productivity and team satisfaction
- Large class size prevents us from closely supervising each team

Tracking Team Progress

- Recall we want to track project productivity and team satisfaction
- Large class size prevents us from closely supervising each team
- Past issues experienced in large Capstone:
 - Did not start implementation *until too late*
 - Individuals and teams had questions but did not ask *until too late*
 - Bullying/workload issues and not brought up *until too late*

Tracking Team Progress

- Recall we want to track project productivity and team satisfaction
- Large class size prevents us from closely supervising each team
- Past issues experienced in large Capstone:
 - Did not start implementation *until too late*
 - Individuals and teams had questions but did not ask *until too late*
 - Bullying/workload issues and not brought up *until too late*
- Goal is to avoid "*too late*" situations
 - Use **biweekly checkpoints**
 - Team log
 - Personal log
 - Peer evaluation assessment
 - In-class meetings

Weekly Team Log (Expected Time: ~ 5 min)

- In repo as a new .md file
- One per team

Weekly Team Log (Expected Time: ~ 5 min)

- In repo as a new .md file
- One per team
- Expected content for each entry:
 - Team name with work performed start date to end date
 - Recap your milestone goals:
 - Which features were in the project plan **for this milestone?**
 - Which tasks from the project board are associated with these features?
 - [Burnup chart](#) (velocity)

Overview

Weekly Team Log (Expected Time: ~ 5 min)

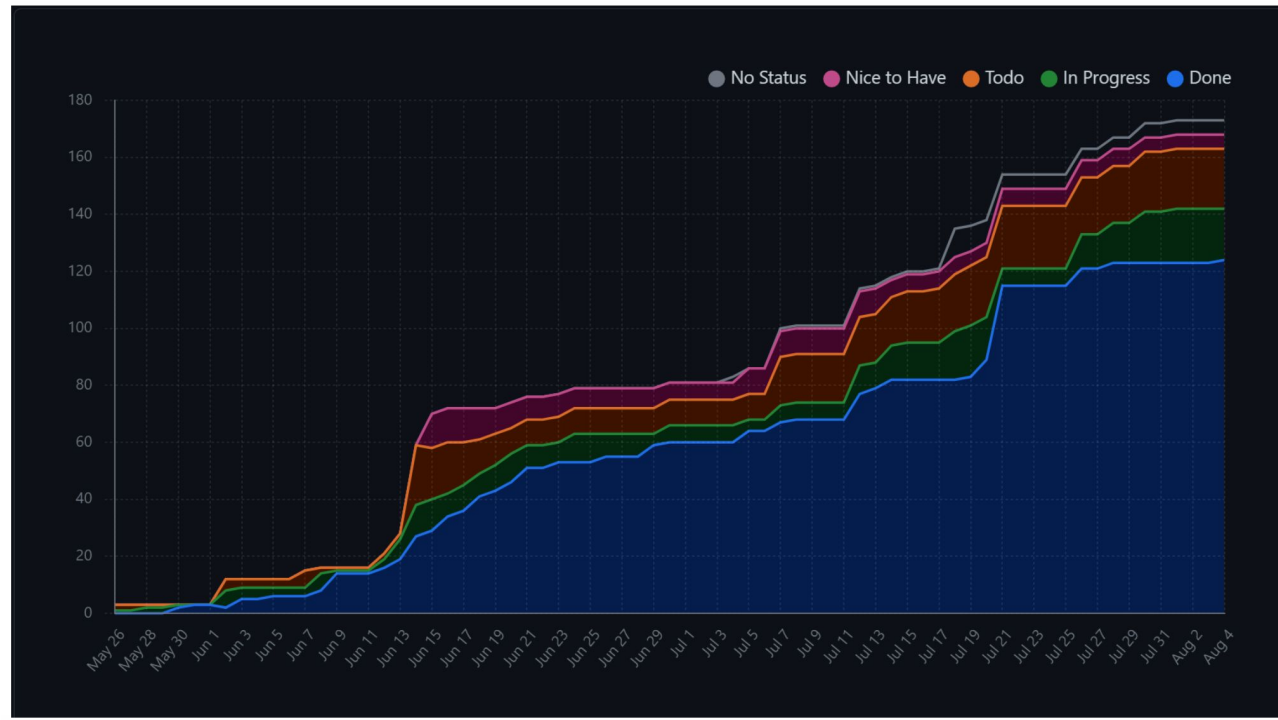

- In repo as a new .md file
- One per team
- Expected content for each entry:
 - Team name with work performed start date to end date
 - Recap your milestone goals:
 - Which features were in the project plan **for this milestone?**
 - Which tasks from the project board are associated with these features?
 - **Burnup chart** (velocity)
 - Quick reminder of username → student name
 - Table view of completed tasks on project board (by which username)
 - Table view of in progress tasks on project board (by which username)
 - Test report
 - Optional text: Additional context that we should be aware of

Overview

Details

Example: Burnup Chart

- Accumulative view of tasks done, tasks in progress, and tasks left to do
- Visual representation of team's **velocity**
- Planned work (straight line at top) vs. completed work

Example: Completed Tasks

- Screenshot from GitHub Projects

Associated task and issue IDs →

Issue title

Team member username (redacted)

Completed Tasks

156	✓	Upload Backup	#287	Done
157	✓	Edit Job Details frontend styling	#289	Done
158	✓	Edit job details client-side validation	#290	Done
159	✓	Projections Styling	#291	Done
160	✓	Push custom order to projector	#294	Done
161	✓	Change projector account password	#295	Done
162	✓	Styling - Fix un-archive styling	#277	Done
163	✓	Styling - Match trash and archive icons and overlay	#278	Done
164	✓	Styling - Move archive and delete icons to be hidden behind edit b...	#279	Done
165	✓	Styling - Clean up unneeded styles	#280	Done
166	✓	Styling - Consolidate repeated styles into one file	#281	Done
167	🔄	Refactor DB + Backend to make manager a VARCHAR	#134	Done
154	✓	Finish import CSV	#285	Done
155	✓	Download backup	#286	Done
128	✓	Job Details Overlay Window - Graphs and Summaries	#61	Done

Example: In Progress Tasks

- Screenshot from GitHub Projects
- Number of In Progress tasks should be relatively fewer than number of Completed tasks

username (redacted)

In Progress

168	 History Screen - Crazy Query #261			In Progress	
169	 History Screen #220			In Progress	
170	 Change static dropdown options to dynamically pull from Global D... #148			In Progress	
171	 fix mass_remove.php to end assignment date (see desc) #269			In Progress	
172	 Help screen #296			In Progress	

Test Report

- Put all tests in the `tests/` directory in your repo
- Pick a test framework
- Are tests passing?
- **Regression testing:**
 - Have a script to run all tests (check availability for your framework)
 - Ensure new feature does not break existing work
 - Script output showing tests run and summary of total tests passed/failed
 - Screenshot or pipe output to a dated file and include in repo
- Automated coverage (later)

Example: Test Report

- Django test output
- Run command
- "ok" is pass

```
(cdk) david@earth:carlsberg-cdk $ fab test
[localhost] local: www/manage.py test webservices --settings=settings_test -v 2 --failfast
Creating test database for alias 'default' (':memory:')...
Creating tables ...
Creating table auth_permission
Creating table auth_group_permissions
Creating table auth_group
Creating table auth_user_user_permissions
Creating table auth_user_groups
Creating table auth_user
Creating table auth_message
Creating table django_content_type
Creating table django_session
Creating table django_site
Creating table django_admin_log
Installing custom SQL ...
Installing indexes ...
No fixtures found.
test_GET_returns_xml (webservices.tests.HelloWorldTestCase) ... ok
test_GET_with_basic_auth_returns_200 (webservices.tests.HelloWorldTestCase) ... ok
test_GET_without_basic_auth_returns_401 (webservices.tests.HelloWorldTestCase) ... ok
test_POST_returns_amended_xml (webservices.tests.HelloWorldTestCase) ... ok
test_POST_save_request_in_file (webservices.tests.HelloWorldTestCase) ... ok
test_POST_saves_content_in_file (webservices.tests.HelloWorldTestCase) ... ok
test_POST_with_basic_auth_returns_200 (webservices.tests.HelloWorldTestCase) ... ok
test_POST_without_basic_auth_returns_401 (webservices.tests.HelloWorldTestCase) ... ok

-----
Ran 8 tests in 0.091s

OK
Destroying test database for alias 'default' (':memory:')...

All tests passed - have a banana!

Done.
```

Clockify

- time tracking, integrated with GitHub

Weekly Personal Log (Expected Time: ~ 3 min)

- In repo as .md file
- Same file per person (append new entry to file)

Weekly Personal Log (Expected Time: ~ 3 min)

- In repo as .md file
- Same file per person (append new entry to file)
- Expected content for each entry:
 - Applicable date range
 - Type of tasks you worked on (screenshot from Peer Eval question)
 - Recap on your week's goals
 - Which features were **yours** in the project plan **for this milestone?**
 - Which tasks from the project board are associated with these features?
 - Among these tasks, which have you completed/in progress **in the last 2 weeks?**
 - Optional text: Additional context that we should be aware of

Weekly Peer Evaluation (Expected Time: ~ 3 min)

- Workload distribution questions
 - Decision making (e.g. task assignment, design choices, code patterns, stylistic variations)
 - Talking/discussions (in-person and online)
 - Doing project work (independently or together)

Weekly Peer Evaluation (Expected Time: ~ 3 min)

- Workload distribution questions
 - Decision making (e.g. task assignment, design choices, code patterns, stylistic variations)
 - Talking/discussions (in-person and online)
 - Doing project work (independently or together)
- Satisfaction questions
 - Variety of factors on team dynamics

Weekly Peer Evaluation (Expected Time: ~ 3 min)

- Workload distribution questions
 - Decision making (e.g. task assignment, design choices, code patterns, stylistic variations)
 - Talking/discussions (in-person and online)
 - Doing project work (independently or together)
- Satisfaction questions
 - Variety of factors on team dynamics
- Types of tasks you worked on in the last week (checklist)  include in personal log

Weekly Peer Evaluation (Expected Time: ~ 3 min)

- Workload distribution questions
 - Decision making (e.g. task assignment, design choices, code patterns, stylistic variations)
 - Talking/discussions (in-person and online)
 - Doing project work (independently or together)
 - Satisfaction questions
 - Variety of factors on team dynamics
 - Types of tasks you worked on in the last week (checklist) 
 - Additional context
 - Acknowledgement
 - Problems
 - Anything else
- Your responses will **NOT** be released to teammates

COSC 499: Capstone Software Engineering Project

For Winter 2023 Terms 1-2

- Download the [course outline](#) that covers course objectives, grading, and various course and university policies. We will review this in the first lecture but if you miss it or forget the information, you can always come back and reference this document.
- **Office Hours:** Tuesdays 2:00-3:00pm and by appointment.
- **Important Dates:** See the [university calendar](#) for important dates and deadlines.
- **Available Projects:** See the list of [projects](#).

Which of the following are you dissatisfied with? Check ALL that apply.

- the amount of work everyone is contributing
- how tasks are allocated to individuals
- the way people help each other
- people's willingness to express their opinions and raise concerns
- people's openness to other's differing opinions
- the way our team interacts with each other
- the progress the team is making as a whole
- how other team members view your opinions and/or your work
- how other team members are treating you overall

What types of tasks did you work on this past week? Check ALL that apply. When you are done, take a screenshot of this question with your answers and include it in your personal weekly log.

- System administration (related to server, network, operating systems, etc.)
- Project planning
- Assigning people to tasks
- Deciding on task priorities
- Creating designs on paper or in digital format
- Coding
- Writing automated tests for your code
- Doing manual testing for your code
- Testing other people's code to see if it breaks
- Documenting your code
- Reviewing other people's code
- Writing class reports
- Giving presentations
- Watching other team's presentations
- Making video demos
- Watching other team's video demos
- Team meetings
- Helping others with their work
- Receiving help from others on my work
- Figuring out a problem on my own (e.g., research, troubleshooting, approach to bug fix)
- Something else (explain separately)

Is there anyone you would like to acknowledge who helped with your progress this week?

Your response here...

Is there any context that we should be aware of that might explain the problems you encountered this week?

Your response here...

Provide any other comments you want to share with the teaching staff.

Your response here...
