Tutorial	# I	- c	ulz

Name:	
Student Number:	

(2<sup>pts</sup>) 1.

Four lightweight balls A, B, C, and D are suspended by threads. Ball A has been touched by a plastic rod that was rubbed with wool. When the balls are brought close together, without touching, the following observations are made:

- Balls B, C, and D are attracted to ball A.
- · Balls B and D have no effect on each other.
- · Ball B is attracted to ball C.

What are the charge states (glass, plastic, or neutral) of balls A, B, C, and D? Explain.
