

Mobile and Wearable Systems - Postdoctoral Fellow

Location: HCI Lab, Department of Computer Science, UBC (Okanagan)

Closing Date: Until filled

Start date: As soon as possible

Description:

The Human-Computer Interaction Lab has an opening for a postdoctoral fellow focused on designing for Mobile and Wearable Systems (e.g., smartphones, smartwatches, AR/VR devices). The successful candidate will join a team led by Dr. Khalad Hasan and will be involved in projects developing novel user interfaces, interaction techniques and interactive devices in the fields of mobile and wearable computing.

Qualifications

A successful candidate has:

- PhD degree in Computer Science, Electrical Engineering, or related field
- Experience in the area of mobile/AR/VR system design and development
- Track record of publications in high-quality venues
- Excellent team working and communication skills
- Creativity, independence

Position:

The candidate

- will design, prototype, and evaluate new mobile and wearable systems and write the results for academic publications
- will contribute to the leadership of ongoing projects while also initiating new ones based on their unique background and expertise
- will have the opportunity to supervise graduate and undergraduate students

The position is a fully-funded one-year contract, renewable based on performance and funding. Pay will be commensurate with typical amounts within Canadian universities and, in addition, will include expense coverage for conference travel.

How to apply:

If you are interested, please submit your

- A cover letter describing your interest and relevant background to the position
- An up-to-date, full curriculum vitae
- Copies of university degree(s)
- Names and contact information of three references

Please send materials to Dr. Khalad Hasan at khalad.hasan@ubc.ca
